MAHA AMINO

Information Technology Engineering & Back_End Developer

+963-993141319 ☎

mahahamino@gmail.com ✉

Syrian Arab Republic/ Damascus ⌂

SUMMARY

Dedicated IT Engineer and Backend Developer with a strong foundation in PHP, Laravel, and RESTful API development. Proficient in web technologies including HTML, CSS, and Bootstrap, complemented by problem-solving skills honed through hands on experience with Arduino and Scratch. Familiar with graphic design principles using Adobe Photoshop, enabling a well-rounded approach to both development and design. Committed to scalable solution and enhancing user experience through innovative and functional applications.

EDUCATION AND COURSES

Damascus University

Bachelor's Degree in Information Technology Engineering (Artificial Intelligence)
2013 - 2020

Union Center for Media Training (UCMT)

Training Certificate on Adobe Photoshop
2023

Vica Web Solution Company

Backend Developer trainee (HTML, CSS, , LARAVEL, RESTFUL API)
2024

SKILLS

- PHP
- Laravel
- MYSQL
- HTML
- CSS
- Bootstrap
- Problem solving
- RESTful API
- Arduino
- Scratch
- Adobe photoshop

CERTIFICATIONS

- Certification in IT Engineering with specialization in Artificial Intelligence.
- Coursera Certification(Computer Vision-Image Basics with OpenCV and Python, Python for Data Science AI & Development)
- SoloLearn Certification(C++, HTML, Java, Introduction to SQL, Introduction to python, Introduction to JavaScript)

PERSONAL PROJECTS

Personal Portfolio (API)

8/2024 - Present
This portfolio is a dynamic application developed using laravel that utilizes RESTful APIs for seamless data management.
- The owner is able to do comprehensive CRUD operations.
- Data Management: Effectively personal information, enabling easy access and management of user data .
- Built with a focus on scalability and performance, ensuring the application can handle expected growth and increased user demands.

Blog (Blade & API)

3/2024 - 4/2024
Developed a comprehensive blog application using Laravel, leveraging Blade for frontend rendering and a robust API for backend.
- Admin Authentication and Authorization: Implemented secure user authentication with Laravel Sanctum, ensuring that only admin users can access protected routes through middleware authorization.
- User Management: Integrated functionality for admin users to ban and unban accounts, empowering effective moderation and user management.
- RESTful API Development: Designed and developed RESTful API endpoints that facilitate efficient communication between the frontend and backend, enhancing the overall user experience.
- Dynamic Content Management: Enabled admin users to manage blog content, ensuring a dynamic and engaging platform for users.

Customer Recommendation Management system (Graduation Project)

1/2018 - 7/2018
Designing an electronic system to manage customer recommendations using Machin Learning and Data Mining Algorithms by (Python).
